

® QUARK  
Qualità per l'Ambiente

## HISTORY

Day after day, service after service, we have been working for 25 years in places where people live, where companies work, public administration operates, families live, where the whole community interacts. Being in the field means essentially dealing with care and protection of the quality of life of all of us, of our projects, of our prospects.

This deep awareness has guided us through the crisis that has affected every market, and our work has been embedded in the national and European industry regulations, placing first and foremost attention to our environment and therefore towards our future. The practice of listening has become a propulsive company quality and it has been adopted on a broad spectrum: to improve ourselves and walk together in a safer, healthier and more natural way.

### OUR MISSION

Working with energy, professionalism and with a concrete ethical impulse, Quark gradually translated and defined its own vision of market in a composite corporate structure, and its organizational excellence is now confirmed by certifications and accreditations.

A person wearing a full-body white protective suit, hood, and respirator mask is standing in a room with wooden tables and chairs. The person is holding a black bag or container. The room has a modern, industrial feel with exposed wooden beams and hanging pendant lights. A black trash bag is on the floor near the person.

**BEING IN THE FIELD MEANS  
ESSENTIALLY DEALING WITH  
CARE AND PROTECTION OF THE  
QUALITY OF LIFE OF ALL OF US**

## QUALITY FOR THE ENVIRONMENT

Canteens, restaurants, hospitals, transport, Urban areas, residential areas, food industries, small/medium and big-sized companies: disinfestation and rodent control services are carried out in any context of daily life with effective and targeted systems, guaranteed both indoors and outdoors and tracked with appropriate documentation in line with the directives of the current legislation and voluntary standards.

# SERVICES

## DISINFECTION

Our disinfection solutions of private and professional areas are able to reduce the greatest quantity of microorganisms such as bacteria, viruses, fungi, protozoa, spores through killing, inactivation or removal /dilution, in order to prevent and control the risk of infecting people or contaminating objects and environments.

## PEST CONTROL

Our Staff works using methods in the full respect of the environment for the disinfection of mosquitoes, cockroaches, beetles, ants, mice, fleas, wasps, bedbugs, woodworms and in general all pests which can cause damage in a private, public and corporate environments.

## RODENT CONTROL

Quark is a leading company in rodent control interventions against mice and rats.

Our qualified staff adopts solutions to eliminate mice and rats in private and business environments, with environmental eco-friendly interventions and environmental contexts.

## PREVENTION AND FOOD HYGIENE

Food analysis. GMO research. Research pesticides. Traceability. Evaluation of the shelf-life of products. Total bacterial load. Total mesophilic bacterial load. Surface water, groundwater and drinking water analysis. Consulting and training. Audit for the verification of compliance (conformity) of workplaces to current regulations in the food industry. Training courses for the staff involved in the agri-food sector. Editing and assessment of HACCP self-regulation plan control. Paperwork for the attainment of CE stamps.

## BIRD PROOFING

Pigeons and other birds represent a serious threat to domestic environments and people's health. These animals are carriers of disease and favor the diffusion of various types of parasites. Removing them becomes therefore an imperative to guarantee the health of environments. Quark provides integrated services not only aimed at keeping distant, but also at cleansing of any parasites and pathogens brought by birds

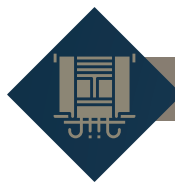

## WOOD MATERIAL PROCESS

Quark provides cutting-edge and resolute treatments for the protection of artifacts in wooden material. Heat Bubble, dedicated for mobile wooden structures such as paintings, tables, chairs and other objects, eliminates the woodworms attracting them through the use of heat. Ecowood, also effective for non-mobile structures such as floors, walls and ceilings, eliminates all xylophagous species including mushrooms through an innovative microwave technology.

## PEST CONTROL NO CHEMICAL

Disinfestation treatments against the main pests with natural products with high repellent power. These methods can be used for treating infestations of mosquitoes, flies, moles, reptiles, aphids, etc. in the full respect for nature and for the life of animals that are removed from the places frequented by humans.

## CLEAN AIR

Inspection, cleaning and disinfection of "aeraulic ducts" to respect and respond to current regulations and to meet the requirements. The presence of chemical and biological pollutants in the aeraulic system affects the health of people who frequent that environment.

# Q WASHROOM

Igiene per l'Ambiente

The exclusive partnership with the prestigious Tork brand offers a very wide range of products in the catalog. Cutting-edge solutions in which design, technological content and degree of assistance mark the excellence of this sector.

Reliability and total satisfaction.

From the needs of your customers to those of the staff dedicated to the management and cleaning of bathroom areas, Quark interprets the Washroom sector as a "live index" that affects the numbers of your business.

## WE KNOW ABOUT WORKING ENVIRONMENTS

We approach the hygiene meeting the needs and the specific requests of every sector.

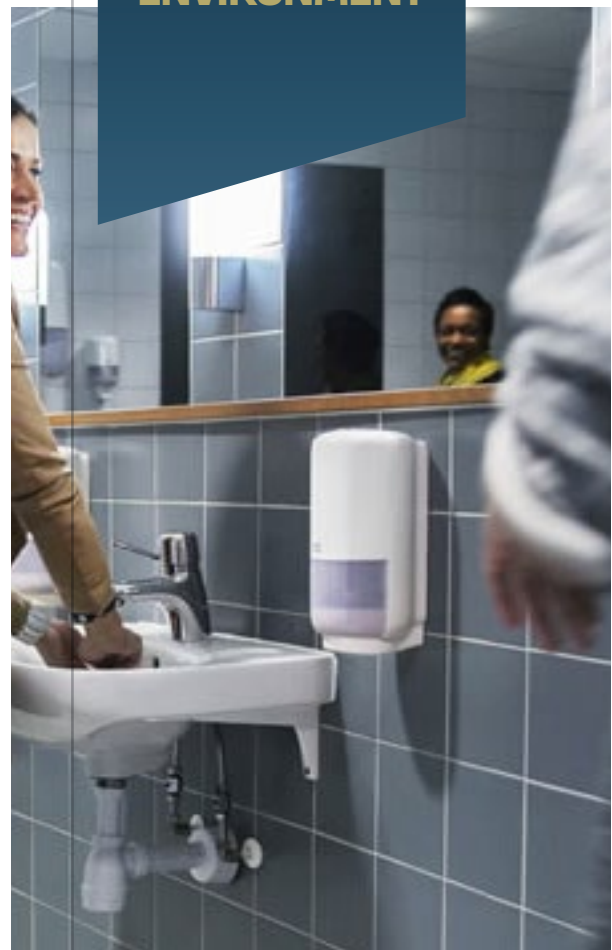

**We provide product combinations, tested to be efficient in particular areas of your business and in every day working life. We have a complete assortment.**

Our dispensers and refills are made for working perfectly together, to perform every single use in the best possible way.

## WE SUPPORT YOU WHEN YOU NEED IT

We are always available to help you to find the right product and organize tests to verify how effective they are for your business.

**HYGIENE FOR THE  
ENVIRONMENT**

## NATURE FOR THE ENVIRONMENT

# VIVAQUARK

NATURA PER L'AMBIENTE

Quark has structured an internal research and development group from which the Viva division was born. The project aims to study and certify innovative treatment systems with products of natural origins. A powerful operational framework studied and developed in synergy with Scientific Research Institutes that traces a revolution in the world of pest control. A system that can be applied to different contexts (corporate, urban, domestic) on many types of pests (eggs, larvae and adults of woodworms, mice, rats, mosquitoes, flies, moles, reptiles, aphids, etc.).

The developed products keep all animals away, including mice, moles, reptiles, insects etc. They wean and remove them from the place where they are not welcome, breaking their habits and peculiar characteristics, such as the sense of smell, with exclusively natural formulations, safe for people and for the environment.

## ITALIAN PEST CONTROL NETWORK

Quark is the company that conceived and promoted the Italian Disinfestation Network RID, "the Made in Italy of disinfestation"; and it's the reference company.

Founded in 2011, RID is a hallmark that selects and activates highly specialized Italian companies in pest control and environmental safety fields applied to civil, industrial and health sectors. According to the different client profiles, RID initializes and coordinates a framework of activities and services that are unique in the Italian panorama.

Excellent numbers support the facts:

- **22.000.000,00 € BUSINESS VOLUME**
- **20 OFFICES AND OPERATING POINTS THAT COVER THE NATIONAL TERRITORY**
- **13 COMPANIES IN THE NETWORK**
- **220 STAFF EMPLOYED**
- **21 CERTIFICATIONS**
- **+150 SPECIALISTS**
- **80 ATOMIZER SYSTEMS**
- **160 EQUIPPED VEHICLES**
- **20 ENTREPRENEURS, EVERY DAY AT THE SERVICE OF PEOPLE AND OF THE ENVIRONMENT**

## INNOVATIVE PMI IMPRESA 4.0

### RESEARCH AND INNOVATION

Recognized as an Innovative SME by the Ministry of Economic Development, Quark boasts important collaborations with Universities, National Research Institutes and formula manufacturers for field trials. An evolutionary path supported by extensive technical and technological equipment as well as by specialistic and multidisciplinary internal training processes.

### PLAN IMPRESA 4.0

The institutional role places Quark as a subject of guarantee in solving any problem related to hygiene and safety; a certainty of the result applied to every field and sector of action, sought year after year by developing innovation and rigid verification systems .

Quark S.r.l. considers the Management System of Quality, Environment and Food Safety a cornerstone of its business strategy, in order to ensure development and growth in a varied and very complex economic reality. The company management has in fact chosen to implement a Quality System which complies with UNI EN ISO 9001: 2008 Standard, with UNI EN ISO 14001: 2004 Standard and a system which complies with UNI EN Standards ISO 22000: 2005 and UNI EN 16636: 2015 with the primary objective of improving more and more its performance and of guaranteeing an excellent quality level of its services. Therefore, Quark srl has decided to implement a Quality, Environment and Food Safety Policy aimed at achieving well-defined and measurable objectives on which the organization intends to invest all the necessary resources and support. The management has the responsibility for the achievement of these objectives and the role to set up any corrective actions that may be necessary to achieve them.

The Quality Manager is required to render periodic checks of the adequacy of the System and all the personnel has to apply the provisions defined by the Management.
